

FUND STRATEGY

The Fund uses a bottom-up selection process based on fundamental security analysis, and does not try to replicate a benchmark. The approach is contrarian and value oriented. The Fund seeks securities that are depressed in price, out of favor with investors, and trading at a substantial discount to intrinsic value. The portfolio manager emphasizes free cash flow generation, balance sheet quality, and the fundamental strength of a business franchise as attributes to identify the most attractive risk/reward proposition across all market capitalizations. The portfolio typically contains 40-60 positions.

PERFORMANCE

Average Annual Returns as of 12/31/17

	3 Month	YTD	1YR	3YR	5YR	10YR
Fund	2.11%	24.18%	24.18%	11.28%	9.97%	5.33%
Morgan Stanley EAFE Net Index	4.23%	25.03%	25.03%	7.80%	7.90%	1.94%

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. The performance assumes reinvestment of capital gains and dividends. Fund performance current to the most recent month-end may be lower or higher than the performance quoted and can be obtained by calling 1-800-697-3863 or visiting www.tocquevillefunds.com.

^The Advisor has contractually agreed to waive management fees and/or reimburse expenses in order to ensure that the Fund's expense ratio does not exceed 1.25% (excluding taxes, interest expense, acquired fund fees and expenses, or extraordinary expenses such as litigation) until at least 3/1/2019. In the absence of these fee waivers, total returns would be lower.

Calendar Year Returns

QUARTERLY UPDATE

- Global equity markets rose to multi-year highs during the quarter, as accelerating global growth and still low inflation combined to drive corporate earnings and valuation multiples higher. With growth picking up outside the U.S., most currencies increased in value against the U.S. dollar, though the Japanese Yen was flat. Commodity prices rose, credit spreads remained tight and volatility low. Japan and Korea were among the strongest performers, while Europe lagged. Among industry groups, industrial metals, agricultural equipment, transport, paper, and food retail performed best, while housewares, telecom services, electric utilities, biotech and drug distribution were weak.
- The Fund benefitted from stock selection in the Industrials and Information Technology areas, which was more than offset by the performance of our Consumer Discretionary, Energy and Health Care shares. There were meaningful positive contributions from Fanuc, Aveva Group, Diageo, Hitachi, Kao, Amano, BHP Billiton and Bolloré, and negative contributions from Nokia, Schlumberger, Sanofi, Bayer, Clear Media, Miraca Holdings and St. Gobain.
- During the quarter, the Fund eliminated its position in DCC, as the share price approached our estimate of intrinsic value. We sold shares of Goldcorp, where production and cost figures fell short of our expectations, causing a reduction in our estimate of intrinsic value. The Fund purchased shares of megabank Mitsubishi UFJ, which trades at a discount to book value and whose return on equity is improving. The Fund also took a position in sporting goods maker Asics, which trades at a multi-year low valuation due to a decline in profit margins, which we expect to recover. The Fund bought shares of Cielo, the dominant merchant acquirer in Brazil that trades at a steep discount to intrinsic value due to macro uncertainty. We added to positions in Miraca Holdings, Smiths Group, Siemens, ISS, CRH, Bayer, Schlumberger, and Sanofi, inter alia.

FUND OBJECTIVE

The Tocqueville International Value Fund's investment objective is long-term capital appreciation consistent with preservation of capital.

PORTFOLIO MANAGER

James Hunt, Portfolio Manager at Tocqueville Asset Management, has been a portfolio manager of the International Value Fund since 2001. Prior to joining Tocqueville in 2000, Mr. Hunt held senior positions at Lehman Brothers and Warburg Dillon Read and served as an analyst at Delafield Asset Management. He has a BA from Brown University and an MBA from Yale University.

MORNINGSTAR RATING™

5-Star Overall Morningstar Rating™ as of 12/31/17 out of 597 Foreign Large Blend Funds. The Overall Morningstar Rating™ for a fund is derived from weighted metrics, which are based on risk-adjusted return performance.

Investors should carefully consider investment objectives, risks, charges and expenses. This and other important information is contained in the fund prospectus which should be considered carefully before investing.

Distributed by Tocqueville Securities L.P.

GLOSSARY OF TERMS

P/E: The weighted average of the price/earnings (P/E) ratios of the equity securities referenced. The P/E ratio is calculated by dividing the current price of the stock by the trailing earnings per share for the past 12 months.

The MSCI EAFE® Net Index is an unmanaged index including approximately 1,000 companies representing the stock markets of 21 countries in Europe, Australasia, and the Far East. Indices are unmanaged and one cannot invest directly in an index. MSCI makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein. The MSCI data may not be further redistributed or used as a basis for other indices or any securities or financial products. This report is not approved, reviewed or produced by MSCI.

The Morningstar Foreign Large Blend Portfolios seek capital appreciation by investing in a variety of large international stocks. Large-cap foreign stocks have market capitalizations greater than \$5 billion. The blend style is assigned to funds where neither growth nor value characteristics predominate. These funds typically will have less than 20% of assets invested in U.S. stocks.

DISCLOSURES

Mutual Fund investing involves risk. Principal loss is possible. **Past performance is not a guarantee of future results.** There are special risks associated with investing in foreign securities, including: differences in accounting methods; the value of foreign currencies may decline relative to the US dollar; a foreign government may expropriate the Fund's assets; and political, social or economic instability in a foreign country in which the Fund invests may cause the value of the Fund's investments to decline.

For the period ended 12/31/17, Morningstar rated the Tocqueville International Value Fund, for the three-, five-, and 10-year periods, respectively, 5, 5, and 5 stars among 597, 535, and 347 Foreign Large Blend Funds, respectively (derived from a weighted average of the fund's three-, five-, and 10-year [if applicable] risk-adjusted return measures and Morningstar Ratings metrics). Investment performance reflects applicable fee waivers. Without such waivers, total returns would be reduced and ratings could be lower. For funds with at least a three-year history, a Morningstar Rating™ is based on a risk-adjusted return measure (including the effects of sales charges, loads, and redemption fees) with emphasis on downward variations and consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% 4 stars, the next 35% 3 stars, the next 22.5% 2 stars, and the bottom 10% 1 star. Each share class is counted as a fraction of one fund within this scale and rated separately. ©2018 Morningstar, Inc. All Rights Reserved.
