

FUND STRATEGY

The Fund seeks to achieve its investment objective by investing in the common stocks of small and mid-cap companies which have the potential to deliver above-average long-term earnings growth, in which earnings and sales growth, valuation, and profitability are assessed through fundamental-based research. The Fund looks for companies which are market leaders in growth industries, have a strong brand name, and whose sales and earnings have increased at a consistent rate. The investment approach includes the analysis of company financial statements in addition to meeting with corporate managements.

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. The performance assumes reinvestment of capital gains and dividends. Fund performance current to the most recent month-end may be lower or higher than the performance quoted and can be obtained by calling 1-800-697-3863 or visiting www.tocquevillefunds.com.

^The Advisor has contractually agreed to waive management fees and/or reimburse expenses in order to ensure that the Fund's expense ratio does not exceed 1.25% (excluding taxes, interest expense, acquired fund fees and expenses, or extraordinary expenses such as litigation) until at least 3/1/2020. In the absence of these fee waivers, total returns would be lower.

Performance for periods before 10/12/10 is for The Tocqueville Small Cap Fund, which was renamed The Tocqueville Opportunity Fund on 10/12/10. The Tocqueville Small Cap Fund had different Portfolio Managers until 7/1/10 and different investment objectives and strategies until 10/12/10.

Calendar Year Returns

QUARTERLY UPDATE

- The Fund appreciated 9.31% during Q2 2019 and outperformed the Russell 2500 Growth Index which increased 4.14%. On a year to date basis through June 30, 2019, the Fund appreciated 37.77% versus the benchmark which increased 23.92%. Both the Fund and the benchmark had positive returns for the quarter despite a significant correction of the benchmark, precipitated by the announcement of increased tariffs on Chinese exports.
- Information Technology, Health Care and Materials investments provided the leading relative performance during the quarter. Information Technology and Industrials sector investments were the leaders on an absolute basis. Financials and Communication Services sector investments were the largest detractors on a relative basis. The Fund held no Energy or Utilities investments throughout the period; this lack of exposure added 11 basis points to relative performance.
- The Fund's performance benefitted from several holdings that were acquired during the period: Array Biopharma, Raytheon, Tableau Software, and Total System Services. Additionally, Ingersoll Rand/Gardner Denver are expected to merge in a Reverse Morris Trust transaction, a tax efficient approach that allows companies to sell off a division. Over the past six months ending June 30, 2019, the Fund has had ten holdings that were acquired.
- Investments in Shopify, Okta and Iovance Biotherapeutics provided the leading returns for the Fund on both an absolute and relative basis. New Relic, Amarin, and Zogenix, Inc. were the leading detractors.
- At quarter's end, the Top 10 and Top 50 investments comprised 31.4% and 68.3% of the Fund respectively, versus 32.0% and 69.5% the prior quarter. The Top 100 investments comprised 87.5% of the Fund, versus 89.2% the prior quarter.

GLOSSARY OF TERMS

P/E: The weighted average of the price/earnings (P/E) ratios of the equity securities referenced. The P/E ratio is calculated by dividing the current price of the stock by the trailing earnings per share for the past 12 months.

The Russell 2500 Growth Index measures the performance of the small to mid-cap growth segment of the U.S. equity universe. It includes those Russell 2500 companies with higher price-to-book ratios and higher forecasted growth values. You cannot invest directly in an index.

The Morningstar Mid Cap Growth Portfolios feature firms that are projected to grow faster than other mid-cap stocks. The U.S. mid cap range for market capitalization typically falls between \$1 billion and \$8 billion and represents 20% of the total capitalization of the U.S. equity market. Growth is defined based on fast growth (high growth rates for earnings, sales, book value, and cash flow) and high valuations (high price ratios and low dividend yields).

DISCLOSURES

Mutual Fund investing involves risk. Principal loss is possible. **Past performance is not a guarantee of future results.** The Fund invests in smaller companies, which involve additional or special risks such as small companies rely on limited product lines, financial resources and business activities that may make them more susceptible than larger companies to setbacks or downturns; and small cap stocks are less liquid and more thinly traded which make them more volatile than stocks of larger companies.
